Sreenidhi Institute of Science and Technology (Hyderabad)

Sep 2019 - Oct 2019

As a part of this training session, i was trained on HTML, CSS, JavaScript and PHP.

I have managed to complete the final project at excellence and achieved a merit certificate.

---

## PROJECTS

## Technical Resources

May 2020 - May 2020

<https://techsourceapp.herokuapp.com/>

This is my blog website which is now turned into educational website. Django framework is the key for this website. Bootstrap made this website really great.

This website is hosted on Heroku server and Postgres serves as database.

## Yolo Detection

Feb 2020 - Feb 2020

[https://github.com/pavan-bash/Yolo\\_Detection](https://github.com/pavan-bash/Yolo_Detection)

Yolo is a classifier algorithm for object detection. It is majorly based on Python and its data science frameworks. Customized yolo algorithms for classification are tested.

## Crime Registration and Awareness

Jan 2020 - Jan 2020

[https://github.com/pavan-bash/Crime\\_Registration\\_project](https://github.com/pavan-bash/Crime_Registration_project)

It is about designing a dynamic responsive website for "Crime Awareness" and a Chat-Bot for "Crime Registration" purpose. Django is the framework and HTML, CSS, JavaScript has worked for front-end of the website. PostgreSQL is the back-end database.

## JSP's

Nov 2019 - Dec 2019

[https://github.com/pavan-bash/JSP\\_Projects](https://github.com/pavan-bash/JSP_Projects)

JSP's are the advanced level servlets pages with stuff like cookies, HTTP-Sessions, Filters etc.,. JSP's make the website dynamic.

## Servlets\_Project

Oct 2019 - Nov 2019

<https://github.com/pavan-bash/Servlets>

This are set of small projects for combined with one another at each stage. Web application with Java is made possible by Servlets.
